

Fayzan Malik

437-246-2116 | fayzanm786@gmail.com | linkedin.com/in/fayzan-malik | github.com/fayzan123 | fayzanmalik.com | Canadian Citizen

Technical Skills

Languages: Python, Java, C, Go, TypeScript, JavaScript, SQL, HTML/CSS, R, Bash
AI & ML: Codex, Claude Code, Gemini, OpenClaw, Nano Banana, LangGraph, CrewAI, AutoGen, MCP, prompt engineering, AI agent governance, model evaluation
Infrastructure: Docker, Linux, PostgreSQL, MySQL, Firebase, Supabase, AWS, Postman, Git
Frameworks: React, Flask, Next.js, Tailwind CSS, FastAPI, Node.js
Libraries: NumPy, Pandas, Matplotlib, TensorFlow, Scikit-learn, PyTorch, Seaborn

Founding Work

Co-Founder & CTO January 2026 – Present
Chox AI – Runtime Governance Layer for Autonomous AI Agents | chox.ai Go, TypeScript, React, PostgreSQL
• Built a **Go HTTP proxy** that sits between AI agents and external APIs, intercepting requests to classify actions, extract structured signals, and enforce governance policies before forwarding traffic.
• Implemented an argument-aware risk scoring and shadow-verdict pipeline for agent tool calls, classifying actions such as read, write, delete, and financial operations before enforcement is enabled.
• Developed the core **Go backend** and **React dashboard** for monitoring high-risk API actions, audit logs, and rule-based governance across developer-built AI agents.

President & Founder March 2026 – Present
Western Agentic Development Club, Western University Claude, MCPs, n8n Workflows, RAGs, LangGraph
• Founded and lead a student-run agentic AI community for computer science students at Western University.
• Organize workshops, hackathons, and networking events in the field of agentic AI.
• Oversee club-led projects where members collaborate across teams to build and ship practical AI agent solutions.

Experience

Backend Development Intern July 2025 – Sept 2025
ICARO Media Group Thornhill, ON
• Refactored and upgraded **LAMP-based web applications**, reducing production friction across internal workflows.
• Built **Flask REST APIs** and resolved latency bottlenecks via profiling, improving median API response time by **15%** under peak load.

Data Analyst Intern June 2024 – Sept 2024
Elite Life Financial Toronto, ON
• Analyzed **500+ client records** with **SQL/Python**, improving recommendation logic and advisor-client personalization.
• Automated repetitive workflows with optimized **SQL queries** and scripts, reducing manual processing time by **30%**.

Selected Projects

Open Source Contribution – agency-agents PR #129 | Bash, Claude, GitHub March 2026
• Contributed a LinkedIn Content Creator agent merged into the **#1 trending GitHub repository**, which had **65,000+ stars** at the time.

Claude Check | Node.js, npm, Anthropic API, CLI Tooling February 2026
• Built and published an **npm CLI** with **650+ downloads** that scores prompt complexity, estimates message count, and returns safe/caution/do-not-start verdicts using real-time **claude.ai** usage checks.

ClearCare | React, TypeScript, FastAPI, PostgreSQL, Vapi, Twilio Hackathon, February 2026
• Built a closed-loop rural referral platform with AI voice follow-ups, SMS alerts, and escalation workflows designed to reduce emergency transfers and avoid up to **\$15,000** per airlift case.

Claude Skills | Claude, Markdown March 2026
• Built and published **context transport**, a Claude skill for reusable context handoff across workflows.
• Built and published **brutal analysis**, a Claude skill that performs evidence-backed product and market analysis via live competitive research and outputs build/pivot/kill recommendations.

Education

Western University London, ON
Bachelor of Science, Honours Specialization in Computer Science Expected May 2027
• GPA: **3.8**; Relevant Coursework: Data Structures and Algorithms, Machine Learning, Databases, Statistics, Operating Systems, Software Engineering.
• Awards: Western Admission Scholarship; Dean's Honor List 2023, 2024.

Certifications

Machine Learning Specialization by Andrew Ng December 2025
Coursera, DeepLearning.AI
